A604, A404 Series: AXLE SEAL UPDATE

The axle metal clad seal was updated to the latest Chrysler design back in 2004. Chrysler made changes to this construction to accommodate the late 2004-UP vehicles, as the axle seal pocket in the case/extension housing and bearing had changed as well. Use of the earlier design seal in these late models will cause the seal to not seat properly and leak. The new design in these kits fits all, PI # 32366.
