722.3/ .4/ .5 STICKING THROTTLE VALVE

When checking for a sticking throttle valve, the Throttle Valve (TV) "E" clip easily breaks upon removal in this recommended procedure. Having this clip in the kit now will ease builder's concerns about removing and possibly breaking the original clip. The clip becomes brittle and 99% of the time will break upon disassembly. Having this clip added to this kit will also eliminate the concerns of having to find a good one in some used valve bodies. The clip is now a part of the kit, PI # 56234.
